

Event Management

1. Approve or reject events submitted by organizers before publication.
2. Modify or deactivate events when necessary.
3. Categorize events (concerts, conferences, sports, etc.).
4. Approve changes proposed by organizers to existing events.
5. Track event statistics (tickets sold, revenue generated, etc.).
6. Manage highlighted events.

User Management

7. Add, modify, or delete administrator accounts.
8. Manage organizer accounts (creation, suspension, deletion).
9. Manage end-user accounts (blocking in case of abuse or complaints).
10. View the activity history of users and organizers.
11. View the number of events an organizer owns, their total revenue, requested payments, ongoing events, completed events, canceled events, and access their events.

Ticket Management

12. Create and list ticket types (e.g., standard, VIP, premium).
13. Track ticket sales statistics (by event, period, ticket type, etc.).
14. Approve refunds in case of complaints or cancellations.
15. Apply promotions or discount codes.

Finance and Payments

16. Track ticket payments (sales, commissions, etc.).
17. Manage payments to organizers after events.
18. Access detailed financial reports (revenue, commissions, service fees, etc.).
19. Configure ticket sales commissions or fees (globally or per organizer).
20. List payment requests.

Report Management

21. Review reports of inappropriate or fraudulent events.
22. Block or deactivate reported events if necessary.

Public Event Management

23. List events associated with each organizer on a public page to easily retrieve the event link in the application.

Reports and Analytics

24. Generate activity reports (sales, active users, popular events, etc.).
25. Track trends in the most appreciated events.
26. Analyze platform performance and suggest improvements.

Notifications and SMS

27. Configure automatic SMS (purchase confirmation, event reminders, etc.).
